SEESAC 

Project FIRE Final Conference

Fighting Illicit Firearms
Trafficking Routes and Actors at
European Level

Milano, 25 November 2016

Abundance of uncontrolled SALW in South East Europe has left death, destruction and underdevelopment

- Continuous potential for national, regional and/or international **instability** (violent ethnic divisions, crime, terrorism, social instability, gender based violence)
- Significant **impact of firearms** on the rule of law, public security, public health, transparency and regional/international cooperation both in the region and abroad

Regional Cooperation Council

*Empowered lives.
Resilient nations.*

SEESAC 

The logo for SEESAC (Small Arms and Light Weapons in the Southeast Asia Region) features the word 'SEESAC' in bold black capital letters, followed by a red circle with a diagonal slash over a silver bullet.
